\* Completely closed suction inlet

\*\* Completely open suction inlet

### **STANDARD FEATURES**

- The STORM SV30 is provided with one carbon brush motor (by pass type). A sturdy plastic cover protects the motor, and reduces the noise to very low level.
- The vacuum can suck up dust or small solid material, thanks to its bag-type polyester filter, or liquids, thanks to a floating device which stops the suction when the collection container fills up.
- The body is made of sturdy PVC, and has a hard protection all around, and turning wheels.
- The vacuum includes a kit of PVC accessories in 38 mm. size, including hand and floor nozzles, 2,5 mt. hose, and one spare collection bag.

### **OPTIONALS:**

- Nylon filter
- Carpet brush
