STANDARD FEATURES

- The STORM SV60 is powered by two carbon brush motor (by pass type). A sturdy plastic cover protects the motor, and reduces the noise to very low level.
- The vacuum can suck up dust or small solid material, thanks to its bag-type polyester filter, or liquids, thanks to a floating device which stops the suction when the collection container fills up.
- A user-friendly tilting collection container enables to dispose easily of big quantities of liquid or bulky solid material.
- The body is made of sturdy PVC, and has a hard protection all around, and turning wheels.
- The vacuum includes a kit of PVC accessories in 38 mm. size, including hand and floor nozzles, 2,5 mt. hose.

OPTIONALS:

- Fitting ring for direct collection into disposable plastic bags
- Nylon filter
- Carpet brush
